

Wall and floor
grilles

SHN (RAL9016)

- Wall grilles
- Steel
- White, RAL 9016
- Adjustable blades

Steel wall grilles single deflection type SHN (RAL9016)

Single deflection wall grilles with adjustable horizontal blades

Brand

- Cairox

Application

- Air supply and exhaust in ventilation and air conditioning systems

Material

- Steel

Colour

- Standard colour white, RAL 9016
- Other colours available upon request

Composition

- Single row of adjustable blades

Mounting

- Invisible mounting with clips in mounting frame, type **CCN**

Accessories

- Mounting frame, type **CCN**
- Volume control damper, type **DWN**
- Plenum box, type **REW**
- Insulating plenum box, type **REW ISO**

Order example

- **SHN, 800, 200 + CCN + DWN + REW**

Explanation

SHN = Grille type

800 = Length (see table)

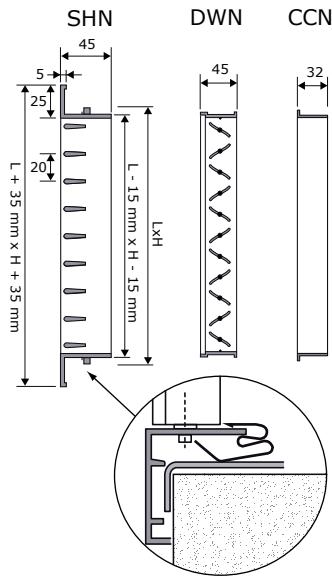

200 = Height (see table)

Accessories (Optional)

CCN = Mounting frame

DWN = Volume control damper

REW = Plenum box

Symbols and specifications

- LxH = Width L and height H in mm
- Q = Air volume in m³/h
- A_k = Effective surface (free area) in m²
- V_k = Average effective velocity through the grill in m/s
- X_{0.25} = Horizontal throw in m at an endvelocity V_t of 0.25 m/s
- P_s = Static pressure loss given in Pa
- L_{w(A)} = Acoustic power in dB(A)
- The throw X_{0.25} is given without deflection of the airstream at an end velocity of 0.25m/s. The distances are given for a smooth ceiling and installation distance of the center of the grille at 300mm from the ceiling surface. When mounted at a distance of 400 to 600 mm from the ceiling, a horizontal deflection towards the ceiling of 15° is advised. When mounted at a distance larger than 600mm from the ceiling, the throw distance X_{0.25} will be smaller than mentioned due to the missing coanda effect. In these cases and for all other special requirements, please contact our engineering office.
- The values are given for isothermal supply air. Throw distances for cooling conditions at -11K can be calculated by dividing the X_{0.25} values with factor 1.1. For heating purposes at D_t of +11K a multiplier of 1.1 should be applied to the given X_{0.25} value.
- Advised mounting distance between centers of multiple grilles in the same wall should be greater than 1/3 of the throw length X_{0.25} (without spread)
- The pressure losses P_s are given for grilles without damper or with fully opened damper.
- The acoustic powers L_{w(A)} are given for grilles without damper or with fully opened damper without room attenuation. Acoustic powers below 20dB(A) are mentioned as "<20" in the tables.

Placement instruction
