

Grilles for galva
ducts

SPN-VH GALVA

- Grilles for circular ducts
- Galvanized steel
- Galvanized natural finish
- Horizontal and vertical blades

Double deflection grilles for circular ducts type SPN-VH GALVA

Double deflection grille with adjustable blades made of galvanized steel

Brand

- Cairox

Application

- For air supply and exhaust in ventilation and air conditioning systems. They are used in particular for mounting on circular ducts.

Material

- Galvanized steel

Colour

- Galvanized steel
- Other colours available upon request

Composition

- Double row of deflection blades with vertical blades in front (distance between blades = 20 mm)

Mounting

- Visible screw mounting on circular duct

Accessories

- Volume control damper **DWN**

Order example

- **SPN-VH GALVA, 400, 100 + DWN**

Explanation

SPN-VH GALVA = Grille type

400 = Length

100 = Height

Accessories (optional)

DWN = Volume control damper

Symbols and specifications

- LxH = Width L and height H in mm
- Q = Air volume in m³/h
- Ak = Effective surface (free area) in m²
- V_k = Average effective velocity through the grill in m/s
- X0.25 = Horizontal throw in m at an endvelocity V_t of 0.25 m/s
- P_s = Static pressure loss given in Pa
- L_w(A) = Acoustic power in dB(A)
- The throw X0.25 is given without deflection of the airstream at an end velocity of 0.25m/s. The distances are given for a smooth ceiling and installation distance of the center of the grille at 300mm from the ceiling surface. When mounted at a distance of 400 to 600 mm from the ceiling, a horizontal deflection towards the ceiling of 15° is advised. When mounted at a distance larger than 600mm from the ceiling, the throw distance X0.25 will be smaller than mentioned due to the missing coanda effect. In these cases and for all other special requirements, please contact our engineering office.
- The values are given for isothermal supply air. Throw distances for cooling conditions at -11K can be calculated by dividing the X0.25 values with factor 1.1. For heating purposes at D_t of +11K a multiplier of 1.1 should be applied to the given X0.25 value.
- Advised mounting distance between centers of multiple grilles in the same wall should be greater than 1/3 of the throw length X0.25 (without spread)
- The pressure losses P_s are given for grilles without damper or with fully opened damper.
- The acoustic powers L_w(A) are given for grilles without damper or with fully opened damper without room attenuation. Acoustic powers below 20dB(A) are mentioned as "<20" in the tables.
